CLEANING CODES REFERENCE GUIDE

Please use the reference guide & specifications to determine which cleaning code applies to the textile you have selected.

C	Machine washable, water temperature not to exceed 160° F, use synthetic detergent. Tumble dry 3 to 5 minutes on synthetic cycle (110° F).
D	Dry clean only.
L	Clean with warm water and mild soap, using clean cloth, as soon as possible.
P	Clean with detergent and water or perchlorethylene.
R	Detailed recommended cleaning and/or disinfecting procedures are available upon request.
S	Only pure, water-free solvents may be used. CAUTION: Use of water-based or detergent-based solvents may cause shrinking and/or permanent water stains.
SM	Same as S. Do not brush.
SW	Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup.
W	Water-based cleaning agents or foam may be used.
WS	See SW.
X	Brush or vacuum only.
XS	Brush and vacuum only, NO liquid cleaners.

Bella-Dura ® and Bella-Blend ®

BELLA-DURA®

Bella-Dura® fabrics are made with solution-dyed yarns. Its inherent stain resistance will never wear off. Cleaning Bella-Dura is easy and safe -- even with bleach. However, a mild soap-and-water solution is all that is required for most spills.

Cleaning Code WS – Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup.

General Recommendations

- Clean with water-based foam or upholstery cleaner or dry cleaning solvents
- Do not saturate with liquids
- Do not get the furniture wet

Regular Maintenance

- Vacuum regularly
- Use the proper upholstery attachment to avoid pilling and remove dust and lint
- Clean periodically to remove build up
- Promptly treat spots and stains

Bleach Cleanable

- To disinfect spray a 4:1 ratio water/bleach mixture on the fabric and allow to linger for the time specified by the Centers for Disease Control and Prevention
- Thoroughly rinse with water and pat dry

Stain Treatment and Spot Cleaning

A professional cleaning service is recommended

Treat stains quickly

- It will become increasingly difficult to remove the longer a stain is allowed to set
- Pretest any cleaning method or agent in a small hidden inconspicuous area
- Several less concentrated applications are less damaging than one concentrated application

Do not let fluids penetrate the surface

- Remove fluids immediately by blotting with a clean, colorfast, absorbent cloth

Remove solid or semi-solid substances

- Using a flat object, remove as much of the stain as possible
- After removal, vacuum thoroughly using the proper attachments before cleaning with an agent

Water-based stains

- Using a soft brush or sponge, apply warm, soapy water to the stain

Oil-based stains

- Use solvent or dry clean solution. Don't apply cleaning agent directly. Apply cleaning agent to cloth or sponge

For all stains

- Use light, quick strokes and start from the outside of the stain and work towards the center
- Do not rub or scrub as this may damage the fabric
- Do not use heat. Heat will set the stain

- Do not over wet as this may leave a ring
- Soak up any remaining cleaning solution
- Use a clean cloth and cool water to remove any residue
- Allow fabric to dry thoroughly
- Vacuum well using appropriate upholstery attachment

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH

RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

DRAPERY CURTAIN

Cleaning Code WS - Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup.

General Recommendations

- Clean with water-based foam or cleaner or dry cleaning solvents

Regular Maintenance

- Vacuum regularly
- Use the proper upholstery attachment to avoid pilling and remove dust and lint
- Clean periodically to remove build up
- Can be commercially laundered or dry cleaned
- If needed, iron on lowest heat setting
- Promptly treat spots and stains

Spot Cleaning

- Drapery can be spot cleaned with both water-based and solvent-based cleaning systems. Spot and Stain removal may also remove accumulated soil from the fabric.

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH

RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

Naked Nylon

NAKED NYLON

Over the course of two years and in partnership with Unifi–the largest yarn supplier in our industry–the first 100% Repreve® solution dyed recycled nylon was developed. The patterns are made of the first new recycled fiber in over 15 years, use less water and energy than virgin nylon, require no additional top coats or finishes and are recyclable. Naked Nylon is bleach cleanable and achieve 100,000 DR.

Cleaning Code WS – Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup.

General Recommendations

- Clean with water-based foam or upholstery cleaner or dry cleaning solvents
- Do not saturate with liquids
- Do not get the furniture wet

Regular Maintenance

- Vacuum regularly
- Use the proper upholstery attachment to avoid pilling and remove dust and lint
- Clean periodically to remove build up
- Promptly treat spots and stains

Bleach Cleanable

- To disinfect spray a 4:1 ratio water/bleach mixture on the fabric and allow to linger for the time specified by the Centers for Disease Control and Prevention
- Thoroughly rinse with water and pat dry

Stain Treatment and Spot Cleaning

A professional cleaning service is recommended

Treat stains quickly

- It will become increasingly difficult to remove the longer a stain is allowed to set
- Pretest any cleaning method or agent in a small hidden inconspicuous area*
- Several less concentrated applications are less damaging than one concentrated application

*Note: Always try cleaning method in a hidden area first to determine result. These are recommended or suggested methods of cleaning, but Momentum Group is not responsible for damage incurred while cleaning.

Do not let fluids penetrate the surface

- Remove fluids immediately by blotting with a clean, colorfast, absorbent cloth

Remove solid or semi-solid substances

- Using a flat object, remove as much of the stain as possible
- After removal, vacuum thoroughly using the proper attachments before cleaning with an agent

Water-based stains

- Using a soft brush or sponge, apply warm, soapy water to the stain

Oil-based stains

- Use solvent or dry clean solution. Don't apply cleaning agent directly. Apply cleaning agent to cloth or sponge

For all stains

- Use light, quick strokes and start from the outside of the stain and work towards the center
- Do not rub or scrub as this may damage the fabric
- Do not use heat. Heat will set the stain
- Do not over wet as this may leave a ring
- Soak up any remaining cleaning solution
- Use a clean cloth and cool water to remove any residue
- Allow fabric to dry thoroughly
- Vacuum well using appropriate upholstery attachment

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH

RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

Polyurethane

POLYURETHANE (PU)

Polyurethane is a type of performance fabric that is made from PU resin, which is coated to a substrate (backing fabric). The resulting product is very durable, has a soft texture, and is easily cleanable.

Cleaning Code WS – Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup.

General Recommendations

- Clean with water-based foam or cleaner
- Do not saturate with liquids
- Do not get the furniture wet

Regular Maintenance

- Clean with a soft sponge using mild soap
- Rinse immediately with water
- Wipe with a dry clean cloth

Bleach Cleanable

- To disinfect, spray a 4:1 ratio water/bleach mixture on the fabric and allow to linger for the time specified by the Centers for Disease Control and Prevention.
- Thoroughly rinse with water and pat dry

Stain Treatment and Spot Cleaning

Treat stains quickly

- It will become increasingly difficult to remove the longer a stain is allowed to set
- Pretest any cleaning method or agent in a small hidden inconspicuous area*
- Several less concentrated applications are less damaging than one concentrated application
- Remove solid or semi-solid substances using a flat object, remove as much of the stain as possible. After removal, vacuum thoroughly using the proper attachments before cleaning with an agent.
- Remove fluids immediately by blotting with a clean, colorfast, absorbent cloth
- Flush stain with water and dry with clean cloth

*Note: Always try cleaning method in a hidden area first to determine result. These are recommended or suggested methods of cleaning, but Momentum Group is not responsible for damage incurred while cleaning.

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH

RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

PRIVACY CURTAIN

Privacy Curtain is a dividing cloth used in hospitals to provide a private enclosure for one or more patients. The privacy curtain is usually made from inherently flame retardant (FR) polyester fabric, and is suspended from a supporting structure or ceiling track.

Cleaning Code WS – Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup

General Recommendations

- Clean with water-based foam or cleaner or dry cleaning solvents

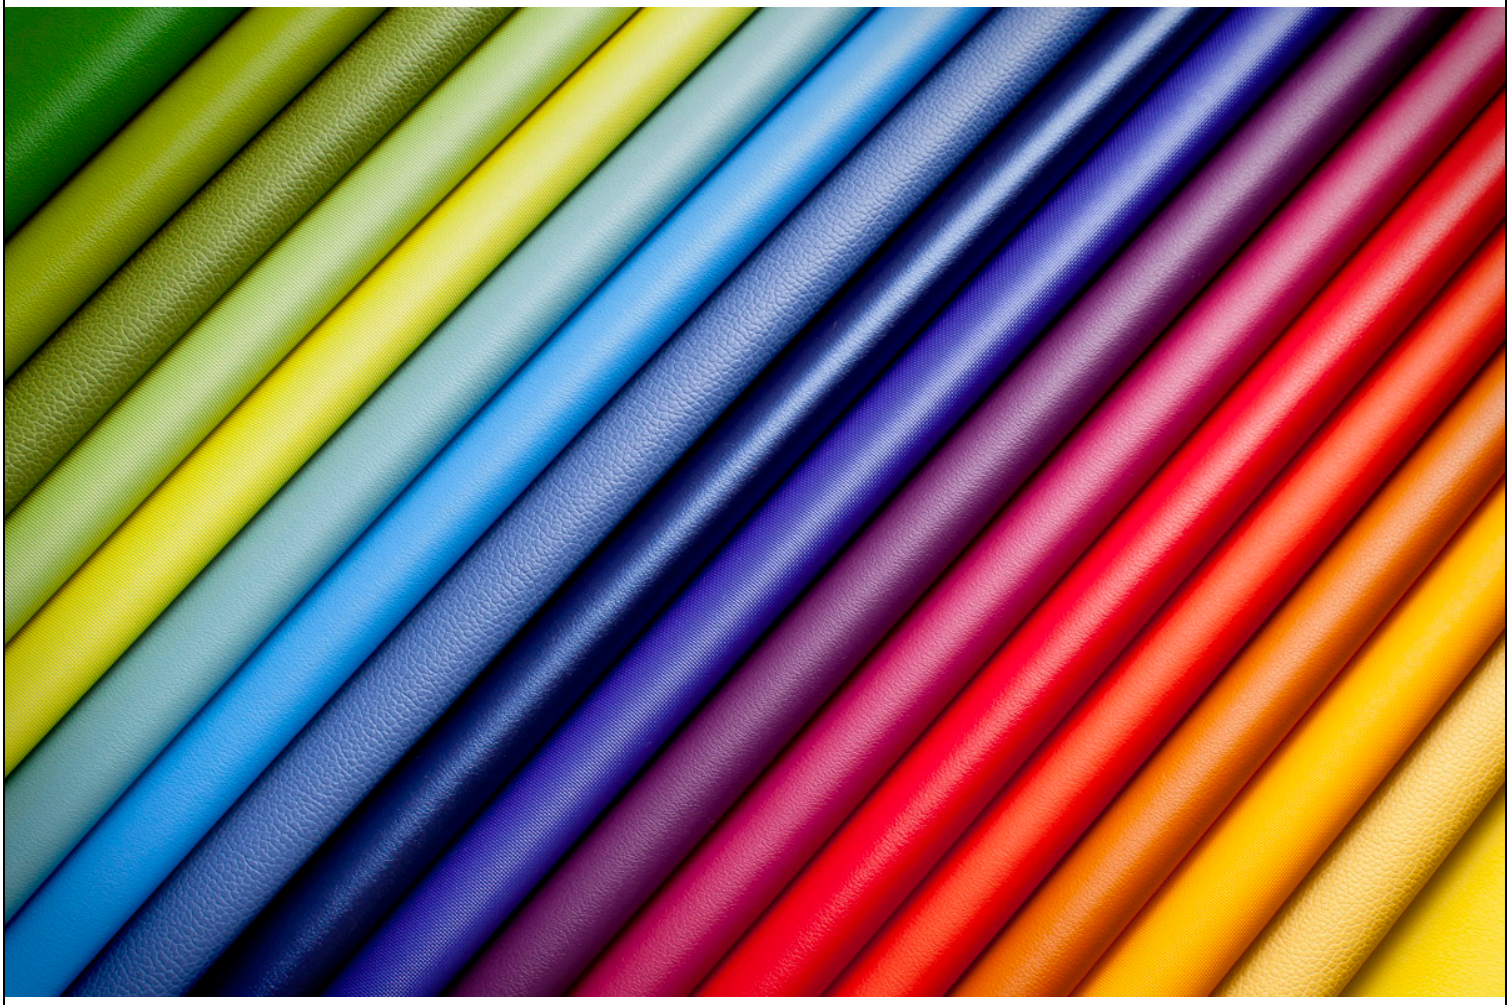

Regular Maintenance

- Machine Wash
- Tumble Dry low
- Can be commercially laundered at 160°F
- Dry at maximum of 140°F
- If needed, iron on low heat setting with a maximum of 275°F avoiding prolonged contact with heat

Spot Cleaning

- Wipe with a damp sponge/cloth and water based cleaner

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH
RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

Silica Family of Products

SILICA FAMILY OF PRODUCTS

Silica is an environmental alternative to vinyl. Developed over the course of two years, our goal was accomplished by creating a new coated fabric made from 100% silicone; zero PVC and zero solvents. Silica is the industry's first and only environmental alternative to vinyl and polyurethane.

Cleaning Code WS – Clean with water-based cleaning agents, foam or pure water-free solvent. Vacuuming or light brushing is recommended to prevent dust and soil buildup

General Recommendations

- Clean with a mild detergent shampoo, foam or dry cleaning solvents
- Do not saturate with liquids
- Do not get the furniture wet

Regular Maintenance

- Clean with a soft sponge using mild soap
- Rinse immediately with water
- Wipe with a dry clean cloth

Stain Treatment and Spot Cleaning

Stain Cleaning

- Clean with a soft cloth using Formula 409 ®, All Purpose Spray or Fantastic ®
- Rinse immediately with water
- Wipe with a dry clean cloth

For the most difficult stains

- Use a 1:1 ratio of bleach to water mixture. Or 1:1 ratio of Isopropyl Alcohol (rubbing alcohol) water mixture
- Rinse immediately with water
- Wipe with a dry clean cloth

Treat stains quickly

- It will become increasingly difficult to remove the longer a stain is allowed to set
- Pretest any cleaning method or agent in a small hidden inconspicuous area*
- Several less concentrated applications are less damaging than one concentrated application
- Remove solid or semi-solid substances using a flat object, remove as much of the stain as possible. After removal, vacuum thoroughly using the proper attachments before cleaning with an agent
- Abrasive household cleaners and steel wool should be avoided

*Note: Always try cleaning method in a hidden area first to determine result. These are recommended or suggested methods of cleaning, but Momentum Group is not responsible for damage incurred while cleaning.

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH

RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

Crypton and Incase

CRYPTON®

Crypton Fabric is a specially engineered fabric system that promises and delivers superior performance from stains and spills. Each fiber of Crypton Fabric is encapsulated with patented technology through an immersion process, so it never breaks down its resistance to stains, moisture, mildew, bacteria, and odors. The impenetrable moisture barrier protects the fabric from spills, keeping stains from setting in the foam of the cushions. The fabric itself is also disinfectable when used in conjunction with EPA-approved Crypton Disinfectant & Deodorizer.

Cleaning Code W – Water-based cleaning agents or foam may be used.

General Recommendations

- Clean with water based foam or cleaner
- Do not saturate with liquids
- Do not get the furniture wet
- Do not use dry cleaning solvents

Regular Maintenance

- Vacuum regularly
- Use the proper upholstery attachment to avoid pilling and remove dust and lint
- Clean periodically to remove build up
- Promptly treat spots and stains

Crypton® suggested cleaning method*

- Wipe off excess spills with a dry cloth
- Use a powdered enzyme detergent mixed with water to clean Crypton. If necessary, use a soft brush
- Wash off the soapy cleaner with clear water. As with any other fabric, take care of spills ASAP

* Note: Always keep in mind that Crypton® is a textile and like all other fabrics, it must be properly cared for to maintain its original features. Besides quickly taking care of spills when they occur, in high use areas, be certain to clean the seating once every three to four months to avoid dirt build up.

Stain Treatment and Spot Cleaning

A professional cleaning service is recommended

Treat stains quickly

- It will become increasingly difficult to remove the longer a stain is allowed to set
- Pretest any cleaning method or agent in a small hidden inconspicuous area*
- Several less concentrated applications are less damaging than one concentrated application

* Note: Always try cleaning method in a hidden area first to determine result. These are recommended or suggested methods of cleaning, but Momentum Group is not responsible for damage incurred while cleaning.

Do not let fluids penetrate the surface

- Remove fluids immediately by blotting with a clean, colorfast, absorbent cloth

Remove solid or semi-solid substances
• Using a flat object, remove as much of the stain as possible
• After removal, vacuum thoroughly using the proper attachments before cleaning with an agent

For all stains

• Using a soft brush or sponge, apply warm, soapy water to the stain
• Use light, quick strokes and start from the outside of the stain and work towards the center
• Do not rub or scrub as this may damage the fabric
• Do not use heat. Heat will set the stain
• Do not over wet as this may leave a ring
• Soak up any remaining cleaning solution
• Use a clean cloth and cool water to remove any residue
• Allow fabric to dry thoroughly
• Vacuum well using appropriate upholstery attachment
• Mix 2 cups of warm water with 1 teaspoon of enzyme laundry detergent (e.g., Tide® or Cheer®)
• Remove excess soil and apply the soap and water mixture to the stained area
• Agitate stain with a soft brush, brushing in a circular motion inward making sure to not "grow" the stain
• Allow solution to remain on stain for one minute
• Blot up the stain with a dry, white towel, rinse any remaining soap with water and blot the area again
• Repeat if necessary

Extraction Cleaning
• For overall cleaning, we recommend periodically extracting upholstered surfaces
• Before wet-cleaning, vacuum the upholstery
• Apply cleaning solution to specific spots and lightly brush
• Follow directions on filling extraction machine with proper solution, wet the area with pre-spray and vacuum up the solution
• Be sure to extract the entire surface of the upholstered furniture to achieve uniform cleanliness

RINSE CLEANING AGENT THOROUGHLY WITH WATER AND WIPE WITH A SOFT CLOTH
RESIDUE LEFT BY CLEANING AGENTS WILL DEGRADE AND SHORTEN THE LIFE AND/OR AFFECT THE PRODUCT'S APPEARANCE IF NOT REMOVED.

For further instructions please refer or the website www.cryptoncare.com

RINSING INSTRUCTIONS

Rinsing cleaner residue is a critical step in the care of fabric.

Cleaning agent residue will continue to degrade fabric, shorten the fabric life and or affect its appearance **if not removed**. Follow rinsing recommendations outlined for each fabric in the Cleaning Guide.

Most fabrics specifically recommend thoroughly rinsing with water and a soft cloth. Do not saturate any fabric with water. See specific cleaning and rinsing recommendations in the Cleaning Guide.
